

ENVIRONMENTAL POLICY

The respect for the environment, nowadays, it's an argument of big interests for everyone and, for Eston Chimica has always been one of the most basic and important purpose. Protect the environment is a big engagement, that is part of our company mission, for this reason the Eston Chimica's attention has, always, turned to the environmental protection. Therefore ESTON CHIMICA commits itself to a policy of continuous improvement, containing where is possible and economically bearable, any negative impact towards the environment. Furthermore, a responsible approach to the development, advises us to replace the dangerous elements with others considered not dangerous for the environment, guarantying to our customers the use of products in keeping with the most recent European and International guidelines. ESTON CHIMICA has intention to reach the upper indicated goals through the following actions:

- Maintain an effective System of Environmental Management in keeping with the requirements of the UNI EN ISO 14001:2009 RULE;
- **Assure that the company's environmental policy and the relative system of management are included, implemented and fulfilled at all the company's levels and that the system is supported by periodic and systematic training activities;**
- Carry out any possible effort in organizational, operational, technological and investment terms, in order to prevent the water, air and soil pollution;
- Minimize the energy and water consumption and the waste production, in order to **encourage it's salvage and recycle where possible;**
- Reduce the package disposal, choosing the purchase of unpacked raw materials and implementing a service of return of the empty containers from our clients in order to reuse them;
- Choose and give preference to supplying companies that are sensible to the environmental problems and which, as Eston Chimica does, put a domestic and foreign company policy into practice, sensitizing their clients and their suppliers of a bigger attention towards these problems.
